

Oncoplastic Breast Surgery Workshop

The Canadian Surgery Forum (CSF) has partnered with the Canadian Oncoplastic Partnership Group (COPG) to draw attention to this workshop for any CSF delegates interested in learning more about oncoplastic surgery.

Hosted by the Oncoplastic Partnership Workshop Series, we are pleased to provide a full day of oncoplastic breast surgery taught by experienced academic and community breast surgeons/ surgical oncologists. Learn techniques and procedures to enhance breast conserving surgery, cosmesis and oncologic outcome for your breast cancer patients! Learn tips and tricks of billing codes and how to have a mutually beneficial relationship with your plastic surgeon. Please join us for live videos, interactive sessions, live breast model marking sessions. This course has sold out previously at previous conferences so don't delay! Includes reception at the end of the course.

Please see our website www.oncoplasticpartnershipworkshop.ca

Target Audience: General Surgeons, Breast Surgeons, Surgical Oncologists

Learning Objectives:

- Explain the principles, levels, benefits and indications of oncoplastic surgery.
- Describe the benefits and outcomes of oncoplastic breast conservation.
- Explain the indications and the technique of donut/binelli mastopexy.
- Describe the indications and technique of the raquet mammoplasty.
- Describe the indications, benefits, types, techniques and outcomes of therapeutic reduction mammoplasty.
- Interpret the potential complications of oncoplastic techniques and how to resolve them.
- Identify use of neoadjuvant chemotherapy as an integral part of optimal surgical management for breast cancer
- Summarize the role of good mastectomy techniques and the efficient ways to work well with your plastic surgeon.
- Compare interesting cases and outcomes that were achieved with oncoplastic surgery
- Interpret how to get appropriately remunerated for oncoplastic breast surgery
