

AGENDA	
7:00-7:30	Breakfast and Registration
7:30-7:40	Opening Remarks –
7:40-8:00	Introduction to Oncoplastics – <i>Become familiar with types of oncoplastic techniques, indications for oncoplastic surgery and rationale for using these techniques</i>
8:30-9:00	Hands-On – Part 1 Crescent Mastopexy-De-Epithelialization and Level 1 Defect Closure - All Faculty <i>Practice level one oncoplastic techniques on breast simulators</i>
9:00-9:20	Level 2 Round Block – <i>Learn incision and indications/patient selection for Round Block mammoplasty and nipple recentralization aspects of this technique</i>
9:20-9:40	Level 2 – Racquet – <i>Learn incision and indications/patient selection for Racquet mammoplasty and nipple recentralization aspects of this technique</i>
9:40-10:00	BREAK
10:00-10:45	Hands-On Part 2 Round Block and Racquet - All Faculty <i>Learn how to make incisions for these Level Two Oncoplastic techniques and practice recentralizing nipple and closing gland appropriately</i>
10:45-11:15	V and J Mammoplasty Techniques – <i>Learn the incisions and indications/patient selection for these two lower mammoplasty techniques and how to manage inframammary fold discrepancy</i>
11:15-11:45	Hands-On Part 3 V-J Mammoplasty – All Faculty <i>Practice VJ mammoplasty techniques on breast simulator including optimizing glandular closure and managing the nipple location</i>
11:45-12:00	Markings for Level 3 Reduction Mammoplasty – All Faculty <i>Practice determining ideal and symmetric nipple location on breast simulator</i>
12:00-12:45	LUNCH
12:45-1:15	Level 3 Reduction Mammoplasty – Superior Pedicle – <i>Learn about more advanced methods of oncoplastic surgery including reduction mammoplasties including appropriate patient selection</i>
1:15-1:45	Level 3 Reduction Mammoplasty – Inferior Pedicle – <i>Learn about more advanced methods of oncoplastic surgery including reduction mammoplasties including appropriate patient selection</i>

1:45-2:30	Hands-On Part 4 Level 3 – Superior and Inferior Pole Reduction Mammoplasty – All Faculty <i>Practice breast marking techniques and both pedicle procedures on breast simulator including optimizing glandular closure and managing the nipple location</i>
2:30-2:45	BREAK
2:45-3:00	Complications – <i>Learn about complications of oncoplastic surgery and how to manage them, including hematoma, lymphedema, flap necrosis and nipple necrosis</i>
3:00-3:45	Small Group Case Discussions – All Faculty
3:45-4:00	Closing Remarks –
4:00-4:15	Evaluation and Feedback
